

Philosophy: An agile programme delivers what is required when it is required – no more no less.

- Principles:**
- 1 - Programme goals are clearly and continuously aligned to Business Strategy
 - 2 - Benefits are realised incrementally and as early as possible
 - 3 - Governance focusses on creating a coherent capability.
 - 4 - Decision-making powers are delegated to the lowest possible level
 - 5 - Agile programmes are iterative and have the ability to contain both agile (at least 1) and non-agile projects
- Themes:**
- 1 - Roles
 - 2 - Governance
 - 3 - Stakeholder engagement, communication and management
 - 4 - Planning
 - 5 - Management and control
 - 6 - Quality management

Agile PgM QRC is based on Agile Programme Management Handbook. Sept' 2014: Henny Portman
