

Agile - failure or success?

Get full overview of more than 30 agile frameworks!

Thursday April 12th, 2 pm-4.30 pm at DTU Diplom, Lautrupvang 15, 2750 Ballerup

Invitation til projektledelsesforedrag

- Do you work as an agile project manager or are you considering it?
- Do you work as a portfolio manager and try to switch to agile project portfolios?
- Do you want your organization to move towards agile forms of cooperation?

If you can answer yes to one of the above questions, DTU may have a very relevant workshop for you. The workshop is free and is held in English.

Come and meet Henny Portman, who has more than 35 years of experience with project management and organizations. He will focus on how you can introduce agile workflows in your organization, on a large scale. The workshop is based on a traditional project organization, with a permanent PMO (at portfolio level) and a temporary PMO at project level. From here, the workshop moves towards the agile project organizations through the following questions:

- What happens when we assemble the team as an agile team?
- What does that mean for the project manager?
- What happens when we add more teams and coordinate them through Scrum of Scrum?
- How many teams can we have before the need for a coordinating project manager arises?
- What happens when we institutionalize the coordination between teams via agile frameworks such as SAFe, LeSS, Nexus, S@S?
- These frameworks introduce an Integration Manager, a Roadmap Manager or a Release Train Engineer and Product Managers and Product Owners. How should we organize them successfully?

There are many agile frameworks to choose from. Henny Portman will give you structure and overview of more than 30 agile frameworks! We look forward to meeting you.
